

THE RERUM NATURA

DE RERUM NATURA: THE NATURE OF THINGS

The Rerum Natura is characterized by its sophisticated alchemical style to match its masterful experience in the herbal tradition. Produced in Italy, this variety of certified organic cosmetics is characterized by a precious fragrance obtained through the exclusive use of essential oils. All cosmetics are enriched with a multitude of organic ingredients, formulated to the strictest standards in terms of sustainability and have obtained THE COSMOS ORGANIC certification. To create the fresh fragrance that characterizes all The Rerum Natura Cosmetics, only pure botanical essential oils have been selected. Distilled from aromatic plants, they thus preserve their intense perfume to provide pure well-being. They do not use synthetic fragrances.

The formulas are devoid of mineral oils or silicones and have been enriched with natural and selected ingredients such as organic aloe vera gel and other precious organic plant extracts and oils. All cosmetics in the The Rerum Natura range have obtained THE COSMOS organic certification. This certification process has been undertaken to deliver a superior end product at both the regulatory and innovation levels.
